Summary

To evaluate whether the San Francisco 49ers would have won Super Bowl LVIII if Patrick Mahomes had quarterbacked the Niners and Brock Purdy had quarterbacked the Chiefs, we need to consider several factors

based on the provided data:

1. Quarterback Performance and Experience:

- **Patrick Mahomes:** With 7 seasons of experience, 28,424 passing yards, 219 touchdown passes, and a quarterback rating (QBR) of 103.5, Mahomes has demonstrated exceptional skill and leadership on the field. His experience includes winning three Super Bowls and consistently leading his team to the AFC Championship Game, showcasing his ability to perform under pressure and in critical games.
- **Brock Purdy:** Despite only having 2 seasons of experience and a smaller sample size of achievements (5,654 passing yards, 44 touchdown passes, and a QBR of 111.4), Purdy has shown promise and resilience. His performance in Super Bowl LVIII and against top defenses indicates his potential as a high-level quarterback.

2. Team Strengths and Weaknesses:

- **San Francisco 49ers:** The 49ers have a strong offensive performance, with a balanced attack that allows them to effectively run and pass the ball. Their defense, particularly the front four and linebackers, helps mitigate the weakness at the cornerback position. However, their run defense has been described as porous during the playoffs.
- **Kansas City Chiefs:** The Chiefs' strengths lie in coaching, key players like Mahomes, and a strong defensive performance, especially in pass defense and aggressive pass rush. Their weaknesses include struggles with wide receivers' hands, vulnerability against the run, and generating explosive pass plays.

3. Impact of Quarterback Swap:

- **On the 49ers:** With Mahomes quarterbacking the Niners, their already strong offense could potentially become even more dynamic. Mahomes' ability to perform under pressure and his experience in winning Super Bowls could address the 49ers' playoff run defense issues by maintaining offensive pressure and controlling the game's pace.
- **On the Chiefs:** Purdy quarterbacking the Chiefs would introduce a less experienced but resilient quarterback. Given the Chiefs' coaching and overall team strength, Purdy could potentially adapt and perform well. However, the lack of Mahomes' unique playmaking ability and experience might impact the Chiefs' ability to overcome their weaknesses, especially in generating explosive pass plays.

Conclusion:

While football games are influenced by numerous variables and the outcome of a single game can never be predicted with certainty, the swap of quarterbacks would likely favor the San Francisco 49ers. Patrick Mahomes' proven track record in high-stakes games, combined with the 49ers' strong offensive and defensive units, suggests that the Niners could have had a higher probability of winning Super Bowl LVIII with Mahomes at the helm. However, it's important to note that Brock Purdy's resilience and potential, along with the Chiefs' team strengths, mean that the outcome would not be a foregone conclusion.

How Was This Done?

Generated by [Michael L. Thompson](#) with OpenAI’s GPT-4 (gpt-4-turbo-preview).

- **Python-based Jupyter Lab Notebook:** The contents of this document were generated through coded prompting of **OpenAI’s GPT-4** using the Python package [instructor](#) by Jason Liu.
 - Input: the text string “Would the Niners have won Super Bowl LVIII if Patrick Mahomes had quarterbacked the Niners and Brock Purdy had quarterbacked the Chiefs?”.
 - Output: this report as an R Markdown text file.
- **GPT-4 Plan Generation:** GPT-4 autonomously generated the query plan (using code based off of an [instructor](#) example).
- **GPT-4 Plan Execution:** GPT-4 then autonomously executed the plan, which involved the following:
 - writing search queries and initiating calls to [Serper \(Google Search API\)](#) for searching,
 - generating responses to the questions in the plan using the searches as context, and
 - creating all text in the Outline, Summary, and Sub-Propositions sections.
- **Python Report Generation:** The Python code then consolidated GPT-4 responses into an R Markdown text file.
- **Manual Rendering:** Manually, this section was written, the Query Plan Outline was re-formatted, and, via **RStudio**, the PDF document was rendered. A few miscellaneous manual formatting corrections were also done. No other content was manually generated or edited.
